TECHNICAL SKILLS

- **Languages:** C++, JavaScript
- **Frontend:** React.js, Redux Toolkit, React Router, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, MongoDB, Appwrite, REST APIs, JWT Authentication
- **Developer Tools:** Git, GitHub, Postman, Cloudinary

PROJECTS

HireFlow-AI

GitHub | Live

React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, pdf-parse, Gemini

- Developed a full-stack AI-assisted recruitment platform connecting recruiters and candidates through job posting, application management, resume processing, and candidate evaluation workflows.
- Implemented JWT-based authentication with bcrypt password hashing and role-based access control, providing protected recruiter and candidate workflows with request validation.
- Built a resume processing pipeline using Multer and pdf-parse to handle PDF resumes, extract resume text, and use Gemini for candidate data analysis and ATS-style evaluation against job requirements.
- Developed REST APIs for job creation, updating, deletion, search, filtering, pagination, job applications, withdrawals, applicant management, and application status transitions using Express.js and MongoDB.
- Designed Mongoose schemas for users, jobs, and applications while implementing validation and controlled application workflows from application submission through recruiter decisions.
- Integrated Cloudinary for resume storage with upload, replacement, and deletion support, using protected endpoints and CORS configuration for controlled file operations.

BlogCraft

GitHub

React.js, Redux Toolkit, Tailwind CSS, Appwrite

- Developed a full-stack blogging platform that allows authenticated users to create, edit, manage, and publish blog content through a responsive web interface.
- Implemented authentication and user-specific content workflows using Appwrite, providing secure access to blog creation and management features.
- Used Redux Toolkit for centralized state management and React Router for structured client-side navigation across authentication and blogging workflows.
- Built reusable and responsive React components with Tailwind CSS to maintain a consistent interface across different sections of the application.
- Integrated Appwrite database and file services for persistent content and file handling, reducing the need for custom backend infrastructure.

EDUCATION

Vellore Institute of Technology

Bachelor of Technology (B.Tech) — Computer Science & Engineering

2023 – 2027

CGPA: 9.16 / 10

CO-CURRICULAR

- The Bits and Bytes of Computer Networking
- Introduction to Machine Learning (NPTEL)
- Marketing Analytics (NPTEL)
- GEN AI Using IBM Watsonx

ACHIEVEMENTS

- Cleared the Dr. G. Viswanathan Coding Challenge conducted across University, competing among students from across the university.
- Selected for the Internal Round of Smart India Hackathon 2024.
- Led a team to a Top 5% finish among participants in the Zelestra × AWS ML Ascend Challenge – 2nd Edition.
- Active participant in VITBMUN, developing communication, leadership, and negotiation skills.
